Alphabet Training ***is committed to establishing and maintaining an energy sustainable company in all aspects of our operation and company ethos.***

Alphabet Training will endeavour so far as is reasonably practicable, to make and maintain its offices, places of work and any other establishments as environmentally sustainable and to promote and encourage energy sustainable procedures for its employees, its properties and users of its properties and facilities.

The promotion of sustainable energy should be seen as a mutual objective for both employer and employee and will be continually reviewed in order to achieve the objectives stated below.

Our objectives are governed by the following principles:

- To minimise pollution to land, air and water.
- To comply with legislation, regulations and other applicable environmental requirements.
- To set realistic objectives and targets for reducing our impact on the environment.
- To always consider the waste hierarchy when managing all waste produced by our activities.
- Prevent, re-use, recycle, recover, and dispose of responsibly.
- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- To seek to minimise the environmental impact of our operations and the most efficient energy consumption.
- To be aware of our regulatory requirements with regard to energy efficiency and carbon reduction.
- A commitment to continuous environmental improvement.
